## *Fellow Tradesmen . . .*

Answering our own question of last season, 1954-55 has been a good year in many ways, and we here at Glen are most appreciative of the business you have given us.

In preparing for the new year ahead, we are keeping in mind primarily the needs of all of you who deal with plants. We have been, and still are, worried by drought. This condition may affect the availability of some sizes, but we are doing everything possible to produce our usual high-class material in spite of uncooperative elements.

Container-grown Citrus is looking good, and we have considerably more of the popular varieties than heretofore for your selection.

Make it a point to visit us as often as possible. There is no better way to establish the cordial relations between buyer and seller so necessary to the healthy growth of our great nursery industry.

***Glen Saint Mary Nurseries Company***

Dependable Since 1882

George L. Taber, Jr., *President*

## CAMELLIAS

The popularity of Camellias is not a new thing but has grown steadily through the years, commensurate with variety improvement and the impetus of commercial Camellia culture.

This is as it should be, for Camellias are among the finest of evergreen shrubs for planting almost anywhere in the South.

Sasanqua Camellias, in particular, are now enjoying a belated surge of consumer interest. This recognition of Sasanqua species is largely due to their amazing adaptability over wide and sometimes diverse growing areas. Hardiness and early blooming are also excellent reasons for their increasing favor.

We maintain that Sasanquas can do much, with adequate and sustained backing, to further the position of Camellias wherever they may be grown—to Memphis, Tenn. and Charlotte, N. C.—and even farther north along the Atlantic seaboard.

### Class A

**GS.** refers to French importations from Guichard Sisters, Nantes, France.

To avoid confusion, the letters **A** through **H** are used following each variety as a guide to sizes available in that particular Camellia.

**Adolphe Audusson.** (GS.) A very large, semi-double flower of deep red with distinctly darker veins. The long yellow stamens are in a cluster in the center and occasionally there are a few petaloids. The dark green leaves are thick, with serrated margins. C, D, E.

**Alba Plena.** Full double, very regularly shaped, wax-like pure white. Early. B, C, D, E.

**Fred Sander.** Flower deep red, occasionally spotted with white. Quite unusual and very desirable. B, C, D.

**Gigantea.** (GS.) Large, peony form, deep red, splotted white. Spreading plant with enormous leaves. C, D, E.

**Il Tramonto.** (GS.) Full double, soft rose-pink marbled white. H.

**Lady Clare (Empress).** Large, semi-double, rose-pink flowers of crepe-like texture; prominent stamens. Hardy; vigorous. B, C, D, E, F.

**Lady Mildred.** Large, semi-double flower of carmine-crimson with deeper veining; petals thick and notched, the inner ones creped. Stamens numerous, sometimes with a few small petaloids around them. The filaments are crimson throughout their length adding greatly to the beauty of the flower. Selected as a seedling at Glen Saint Mary Nurseries. D, E.

**Mathotiana.** Very large, full rose form, deep rose-red, outer edges turning purple with age. A, B, C, D, E, G, H.

**Mathotiana Rosea.** (GS.) Very large, rose shape, rose-pink. B, C, D, E, F, G.

**Valtevedo.** (GS.) Full double, cupped, pale pink center petals shading to a deeper rose on the outer petals. Strong grower. D.

**Wm. S. Hastie (Col. Firey).** Formal, dark red flowers, true double, rather flat. Hardy. Excellent. B, C, D, E.

CAMELLIA, ALBA PLENA

## Class B

- Comtesse Canarii.** Imbricated salmon. F.
- Debutante.** Peony type, soft pink. Hardy. Early. B, C, E.
- Elegans (Chandler).** Very large, incomplete double, cherry-red to rose-pink, splotted with white. A, B, C.
- E. L. Steele.** Brought to our attention by the late E. L. Steele, a past president of our Company. Pure white, about 3 to 4 inches in diameter. The flowers are high-centered, of incomplete double form, with yellow stamens interspersed. Usually at its best in January and is remarkable for its prolific blooms borne on a strong bush. Foliage of good size, fine dark green. One of the best whites we know and not so temperamental as many others. B, C, D, E.
- Enrico Bettoni.** Very large, full, peony-form flowers of clear satiny pink. The petals in the center are erect and sometimes folded back, while the outer petals are fluted and deeply notched. Stamens are interspersed, even to the outside rows of petals. C, D.
- Gloire de Nantes.** Large, semi-double, very deep rose; long yellow stamens. A, B, C, D, E, H.
- Herme.** Large, peony form, white with red and pink stripes and splottes. A, B, C, D, E, F.
- Latifolia (Fanny Bolis).** (GS.) Flower medium size, semi-double, variegated carmine with white splottes. Stamens usually centrally clustered. A free bloomer from December through March. Hardy; vigorous and symmetrical. E, F.
- Marie Morren.** (GS.) Medium to large, rose with deeper veins, occasionally flecked with white. C.
- Pink Perfection.** Medium size, shell-pink. Free blooming. B, C, D.
- Pink Star.** Peony form, bright rose-pink, with stamens and petaloids interspersed. Large flowers, somewhat star-shaped. C, D.
- Prince Eugene Napoleon.** Double, medium size, scarlet. A, B, C, D, E, F.

---

Order Glen Peat by the yard in truckloads.

**CAMELLIA, PRINCE EUGENE NAPOLEON**

**CAMELLIAS, CLASS B, continued**

**Prof. C. S. Sargent.** Very double, peony form, varying from clear crimson to light red. C, D, E, H.

**Victor Emmanuel.** This Camellia is outstanding because of its great beauty of form and its brilliant coloring. The flowers are peony form and of a deep rich red. Its petals are raised and slightly fluted, and the stamens are in one large central cluster. The plant is compact, with deep green foliage, and blooms from midseason to late. B, C, D.

**Virginia Franco.** (G.S) Pinky white ground striated with deeper pink. D.

**Class C**

**Angela Cocchi.** (GS.) Variegated, sparsely marked with carmine stripes on flesh-pink, almost white ground. The blooms are medium size. C, D.

**Celtic Rosea.** Formerly Semi-Double Blush. Propagated from a French import. Semi-double, with petals of the palest blush-pink. Long yellow stamens. Very dainty and beautiful. C, D.

**CAMELLIA, PROF. C. S. SARGENT**

## CAMELLIAS, CLASS C, continued

- Elizabeth.** Double, medium size, rarely pure white but more often striped with pink and sometimes solid pink. D, E.
- Horkan.** A fine variety with semi-double flowers, variable in coloring, but white usually predominates, with pink or rose markings. Interesting and attractive. C, D, E.
- Imperator (American).** Incomplete double, turkey-red, medium size, free flowering, desirable. D, E, F.
- Jarvis Red.** Semi-double, blood-red, with yellow stamens. A, B, C, D, E.
- Kellingtonia.** (GS.) Large, peony type, rich pink, lighter in center. A, B, C, D, E.
- Takayama.** Flowers tend to be small; self carmine shading lighter toward center. Of regular imbricated form. The blooms are borne profusely and the whole effect is most pleasing. D, E.
- Theresa Massini.** Shell-pink, similar to Pink Perfection, and foliage on the same order. Leaves small and growth compact. B.
- T. K. Variegated.** Semi-double, pale pink with shadings of deeper pink and lavender; large cluster of stamens. D.

## CAMELLIA, MINE-NO-YUKI

## AZALEAS

### AZALEA INDICA

The Indian Azaleas are evergreen shrubs with large, single, or double flowers that sometimes measure 4 inches across. Some are slow-growing, practically dwarf, while others grow rapidly into large shrubs. Colors are varied and very beautiful.

#### Red and Deep Pink

**Brilliant.** Early to midseason. Compact, bushy plants with small leaves. Free bloomer, bearing flowers of deep rose-pink.

**Southern Charm.** A sport of Formosa in clear rose-red. The flowers are large and blooming time is about the same as its parent; midseason. Strong grower with good dark green foliage.

#### Light Pink

**Elegans.** Early. A fast grower of rather open habit. Free flowering and easy to grow. Flowers of medium size.

**Elegans Superba (Pride of Mobile).** Midseason. Similar to Elegans but more compact in growth. Flowers are larger and brighter pink.

**George Franc.** Early. Hardy and bushy. Bears large flowers in profusion.

#### Orange

**Macrantha.** Very late. Medium-sized flowers. Hardy, bushy growth.

**President Clay.** Early. Tall, open growth; free flowering. Medium-sized blooms.

#### Salmon

**Lawsal.** Midseason. Hardy, rather bushy. One of the best.

### Azalea Indica Variegated

**George Lindley Taber.** Our own origination, named for our founder. Soft lavender-pink, faintly streaked darker pink and mottled cerise. Slightly fragrant. A rapid grower, resistant to cold. Usually blooms here in March.

#### Lavender

**Formosa.** Midseason. Very large flowers of lavender-lilac. Hardy, easy to grow.

#### White

**Fielder's White.** Early. Large, pure white flowers. Strong, upright grower; free blooming.

**New White.** Early. A bushy grower with deeper green foliage than Fielder's and smaller flowers.

ROSE, ETOILE DE HOLLANDE

## ROSES

## Roses on Multiflora Rootstock

HT., Hybrid Tea; T., Tea; C., China; N., Noisette; CT., Climbing Tea.

**Betty Upchurch.** HT. Salmon-pink with coppery carmine reverse. Free blooming.

**Cl. Marechal Niel.** N. Deservedly famous old-time climber. Full yellow flowers. Sturdy plant.

**Cl. Perle des Jardins.** CT. The best climbing yellow Rose for the South.

**Dainty Bess.** HT. Distinctly different type. Flower 3½ to 4 inches across, single, broad-petaled, with crinkled edges, delicate rose-pink. The prominent stamens remind one of Cherokee.

**Editor McFarland.** HT. The finest deep pink. Long lasting.

**Etoile de Hollande.** HT. Gorgeous deep red. Blooms all summer. Always dependable.

**Kaiserin Auguste Viktoria.** HT. Pure white. Especially good in the South.

**Lady Hillingdon.** T. Apricot-yellow. Slender, pointed buds. Free bloomer.

**Louis Philippe.** C. Good dark red shrub Rose. Continuous bloom.

**Luxembourg.** HT. An extremely satisfactory Hybrid Tea Rose for southern gardens. The flowers are rich apricot-yellow, shaded with copper and lighter yellow at the tips of the petals.

**Mrs. P. S. du Pont.** HT. Stands in the front rank of yellow garden Roses and can be depended on always to provide admirable yellow buds. It has been awarded high Rose honors, and even today after many years retains its popularity.

**Pink Radiance.** HT. Globular, cameo-pink. Blooms continuously.

**Red Radiance.** HT. Rosy red form of Radiance.

## SHRUBS AND HEDGE PLANTS

### ABELIA GRANDIFLORA

One of our very best evergreen shrubs for foundation plantings, corner groups, single specimens, or ornamental hedges. The small leaves are bright glossy green, turning to a beautiful bronze in winter. Its flowers come in early May and the plant is covered with bloom until late autumn.

Bushy trimmed.

Gal. cans, 2 to 3 ft.....	7	50

**CESTRUM NOCTURNUM (Night-blooming Jessamine)**

A shrub 6 to 9 feet high, adapted to south Florida. The branches are curved and willowy, producing creamy yellow blooms that are fragrant at night.

Gal. cans .....	10	\$7 50
-----------------	----	--------

**CLEYERA JAPONICA**

A fine evergreen shrub with rather thick, glossy leaves and creamy white, fragrant flowers. Berries red in early fall. An upright grower, reaching a height of 10 to 12 feet. Will withstand wet or dry situations with equal ease and seems to have few insect or disease enemies. We recommend it highly for trial as far north as Atlanta inland or Wilmington, North Carolina, on the coast.

**ABELIA GRANDIFLORA**

## CYDONIA JAPONICA

## COTONEASTER FRANCHETII

A beautiful evergreen completely hardy in the South. Leaves small, silvery beneath and green above. Gracefully drooping in habit, it can well be used where a low-spreading plant is indicated. Flowers white, followed by orange-yellow fruit.

B&B	10
12 to 18 in. ....	\$6 50
18 to 24 in. ....	10 00
2 to 3 ft. ....	15 00
3 to 4 ft. ....	22 50

## CYDONIA JAPONICA (Flowering Quince)

We do not hesitate to recommend both the red and the pink-flowering varieties for vivid and profuse spring color. They have been grown at Glen Saint Mary for several years now with good success. Half deciduous in this section, they seldom attain more than 5 feet in height, with about the same spread. Spiny branches; leaves 2 inches long, coarsely toothed. Flowers average 1 inch in diameter and are orange-scarlet or salmon-pink—two distinct types, so far unnamed here. Both mature yellow fruit.

Red and Salmon-Pink.

**HIBISCUS**

In order that we may conform to the present trend, our Hibiscus for this season are cutting-grown so that, regardless of cold weather, the variety "carries on."

**Assorted Varieties.**

Cutting Grown	10
Qt. cans.....	\$3 50

**HIBISCUS MUTABILIS (Cotton-Rose; Confederate Rose)**

Tree-like tall shrub; flowers opening white or pink, changing to deep red by night. Especially prized in southern gardens.

Gal. cans.....	10	\$10 00
10-in. cans.....		20 00

**HYDRANGEA HORTENSIS**

Ornamental deciduous shrubs adapted to shady and half-shady locations. The white varieties bloom true to color; the others may be pink or blue, depending upon soil and culture. Pink blooms may usually be turned blue by the use of extra acid in the soil and blue varieties changed to pink by sweetening the soil with lime. Valuable as pot-plants indoors or used outside as flowering shrubs. The different varieties cover a long blooming season.

**Engle's White.** Midseason. Strong grower. White.

**Europa.** Early. Salmon-pink.

**Gertrude Glahn.** Midseason. Dark rose.

**Hamburg.** Early. Carmine.

**Strafford.** Midseason. Dark pink.

	\$8 50

NEW PURE WHITE CRAPE-MYRTLE

**LAGERSTROEMIA INDICA (Crape-Myrtle)**

This vigorous, easily grown deciduous shrub or small tree is sometimes called "The Lilac of the South" or "June Rose." It bears immense bouquets of bright flowers during the greater part of summer.

Rose, Watermelon-Red

Standards, Watermelon-Red

B&B	Each
2 to 3 ft. ....	\$2 00
3 to 4 ft. ....	2 75

**LAGERSTROEMIA INDICA, PURE WHITE**

A distinct improvement over the old-time type, this latest acquisition is a profuse bloomer. Flower heads are larger, and there is no other color in them but white and the yellow of the stamens. Growth habit is stocky, compact and vigorous, thus permitting a choice of either tree-form or shrub, according to preference of growth. New Pure White is something special in Crape-Myrtles!

Gal. cans, 12 to 18 in. ....	10 00
------------------------------	-------

**LAGERSTROEMIA INDICA, WILLIAM TOOVEY.**

This fine watermelon-red differs from the older type principally in its habit of growth, which is much more compact and low-spreading. An excellent variety for hedges and low screens, as well as for specimen use in the landscape plan.

Bare-Root	10	100
18 to 24 in. ....	\$5 00	\$45 00

3 to 4 ft. ....	10 00	90 00

B&B, double above prices.

**LANTANA SELLOWIANA (delicatissima)**

Beautiful flowering shrubs adapted to Florida. Lilac flowers, freely produced, and dark green foliage. Of trailing habit and a rapid grower. Fine for window-boxes, baskets, and as a ground-cover.

Gal. cans. ....	10
	\$5 00

**LIGUSTRUM CORIACEUM (Dwarf Privet)**

A small, bushy, hardy variety, with extremely dark green, crinkled leaves. Very ornamental. A handsome variety known also as *L. japonicum rotundifolium*.

Natural Growth

B&B	10	100
12 to 18 in. ....	\$12 00	\$110 00

2 to 3 ft. ....	20 00	
3 to 4 ft. ....	27 50	

**LIGUSTRUM ERECTA**

New compact and semi-upright variety, having the appearance of a *Nobile-Iwata* hybrid. While apparently not as hardy as *Lucidum*, this fine variety has much to recommend it.

**LIGUSTRUM EXCELSUM SUPERBUM**

A very showy sort with brightly variegated green and white leaves. A rapid grower, good for screens and windbreaks.

**LIGUSTRUM IWATA**

An intermediate grower with small, slightly mottled foliage. Ideal for low foundation plantings and hedges.

---

Join the American Association of Nurserymen and help yourself to increased profits through this splendid organization. Write Room 635, Southern Building, Washington 5, D. C.

**LIGUSTRUM LUCIDUM (Wax-leaf Privet)**

Very bushy, with rich dark waxy leaves and panicles of white flowers followed by large bunches of black berries. For foundation plantings, hedges and specimens.

Our Ligustrums are grafted on root-knot resistant Quihoui stocks, except where otherwise noted.

Natural Growth, bushy.

**LIGUSTRUM, SUWANEE RIVER. Plant Patent No. 1402.**

We are growers of Suwanee River *Ligustrum* on Quihoui root. Suwanee River is a new dwarf patented Privet, introduced by Wight Nurseries in fall, 1954. This brand-new variety is slow enough in growth to be planted around a modern ranch-type home, and yet grows fast enough that it can sell at a reasonable price.

Suwanee River is a hybrid, the parents being *Ligustrum lucidum* (Wax-leaf Privet) and *Ligustrum coriaceum*. The foliage is a deep lustrous green, smaller than Wax *Ligustrum*, and slightly twisted. The nodes are close together, so that the foliage almost completely hides the woody stems. It appears to be immune from attacks of white fly and other insects. It should be an excellent addition to the broad-leaved evergreens for the Southeast, the Southwest, and the Pacific Coast. It is also being tested in other regions to determine its hardiness.

We hope to have a good supply of Suwanee River for fall and winter sales, in 12 to 18 in. and 18 to 24 in. grades, and shall welcome your inquiries concerning this interesting introduction.

**LINDERA BENZOIN (*Benzoin æstivale*; Spicebush)**

An attractive aromatic shrub, native in Asia and North America. Semi-deciduous in our climate; the leaves usually turn yellow in autumn. Inconspicuous yellowish blooms followed by scarlet fruits. Does best in moist places.

Gal. cans, 12 to 18 in.....	10	\$7 50
-----------------------------	----	--------

**MAGNOLIA FUSCATA (*Michelia fuscata*; Banana Shrub)**

A splendid, hardy, broad-leaved evergreen with dark, glossy foliage. The creamy yellow flowers look like miniature bananas and the fragrance is identical. This shrub may be trimmed or left to grow naturally, often reaching a height of 15 to 20 feet.

**MAGNOLIA LILIFLORA NIGRA (*Soulangeana nigra*)**

Similar to *M. liliflora* but with larger flowers that are darker in color. Midseason.

**MAGNOLIA RUSTICA RUBRA**

Dark red, cup-shaped flower blooming a week or so later than *Soulangeana*. A very fast grower.

**MAGNOLIA SOULANGEANA**

A deciduous Oriental shrub or small tree. This fine variety has flowers that are pinky purple on the outside and creamy white within. Blooms early spring, usually before new leaves appear.

12 to 18 in.....	\$12 50
18 to 24 in.....	17 50
2 to 3 ft.....	27 50

**PEACH, FLOWERING, HELEN BORCHERS**

Double-flowered variety. The clear pink flowers average over 2 inches across; petals are ruffled and incurved. When cut for use in the home the blooms hold up unusually well. The tree is a vigorous grower, particularly when planted on medium to heavy lands. When these are not available, a mulch of straw or leaves will help.

Bare-Root	10
2 to 3 ft.....	\$10 00
3 to 4 ft.....	12 50
4 to 5 ft.....	17 50

B&B, double above prices.

**PHOTINIA GLABRA**

A very handsome, hardy, evergreen shrub which will grow to a height of approximately 15 feet. The new foliage is wine colored and most attractive. The white flowers are carried in clusters and are followed by round red fruits. Prefers a sunny location in well-drained soil.

**PHOTINIA SERRULATA**

This variety grows to a much greater height than *Glabra* and is a beautiful sight in summer with its dark green, serrated leaves and large clusters of white flowers. In winter it is covered with scarlet fruit.

### CASUARINA CUNNINGHAMIANA (Australian Pine)

A fine avenue tree that does well near salt water. The branches are jointed, and dense heads of tiny flowers form globular cones.

	10	100
Qt. cans.....	\$3 00	\$25 00
Gal. cans.....	6 00	50 00

### CERCIS CANADENSIS (American Redbud)

The American Redbud or Judas Tree is a small, nicely shaped, deciduous tree with rounded leaves and produces an abundance of rosy pink flowers in early spring. As the blooms appear before the foliage, a Redbud in full flower is a lovely picture.

**CERCIS CHINENSIS (Chinese Redbud)**

An Asiatic Redbud with purplish pink flowers. Individual blooms, often measuring  $\frac{3}{4}$  inch in length, are borne in heavy clusters along the branches. Ultimate height is said to be around 50 feet and the rate of growth is somewhat faster than that of Canadensis. The foliage and general appearance of the tree is very similar to that popular and well-known type.

Bare-Root	10	100

B&B, double above prices.

**CERCIS CANADENSIS ALBA (White Judas Tree)**

One of the most unusual spring-flowering trees to be found anywhere is the white variety of Redbud (*Cercis canadensis alba*). Bloom is pea-like, pure white and is usually produced in early spring before the leaves appear.

Although in many respects the tree is similar to the usual type, Alba foliage is much lighter green upon the upper surface than that of Canadensis. Its broad, flat head of thornless, angular branchlets is distinctive wherever seen.

Unquestionably, Alba is rare and deserving of an important position in the American horticultural picture.

Gal. cans, 12 to 18 in.....	27 50
10-in. cans, 2 to 3 ft.....	50 00

**CORNUS FLORIDA, WEAVER**

This is a superior variety. Because of unique foliage coloring and formation, Weaver is readily distinguishable from ordinary Seedling Dogwoods. Blooms are more numerous and larger, therefore appearing whiter. Trees of Weaver reach blooming age more quickly than any Dogwood we have grown heretofore.

**HOLLIES**

Our Hollies are grafted from the finest selected strains of fruiting trees and should not be compared with seedlings. Choose any one of the types offered below, or better still, order the whole collection and you will never again be satisfied with ordinary Hollies.

**Croonenburg.** A Greenbrier origination. Upright, rather compact grower with fine dark green foliage of larger than average size and spiny leaves. Berries are a good red and are produced when the trees are still very young.

**Ft. McCoy.** Narrow, very spiny leaves on slender branches distinguish this variety. Berries abundant. May be readily trimmed.

**Howard.** The most popular variety we grow. Foliage very dark and glossy, with some spines; berries red and attractive. Excellent.

**Hume No. 1.** A vigorous grower, spreading in habit, with large, almost spineless leaves. Bears regularly. The fruit is red and of large size.

**Male.** Occasionally a Male Holly (staminate) is necessary, and we grow a limited number of them each year. Ask for special quotation on these.

**Savannah.** An attractively upright and rapid grower, this Holly attains true form sooner than most. Foliage abundant, leathery, bright. Berries good size, of fine color. Leaf petioles and branch tips are purple in new growth.

**Prices—All preceding Hollies except Male.**

MAGNOLIA GRANDIFLORA

**MAGNOLIA GRANDIFLORA**

The great Bull Bay is the South's finest native evergreen tree; forest specimens often reach a height of 80 feet. The trees are roughly pyramidal in form with heavy leaves 5 to 8 inches long, glossy dark green above, and covered with soft brown felt beneath. The picture made by one of these magnificent trees in the sunlight is one any home-owner may justly be proud of. The flowers, which are produced over a period of two to three months in summer, are great waxy, creamy white saucers, 7 to 8 inches across, each bloom with a mass of yellow stamens and giving out a delightful fragrance. Its flowers are followed by large pods covered with brilliant red seeds.

Years ago we found that there was a great variation in seedlings, so we selected the most perfect types and grafted from them. In this way we have built up a strain, which we have named Saint Mary, superior to the wild trees and, we believe, to any stock in commerce anywhere. Our trees are uniform in size, shape, foliage and flowers, making them especially desirable for street planting.

**Grandiflora Saint Mary, Grafted**

**QUERCUS AQUATICA (Water Oak)**

A tall and fast-growing Oak, to 80 feet. Nearly evergreen in our climate. Bluish green leaves about 3 inches long.

**QUERCUS PRINUS (Basket Oak)**

Often attains 100 feet. Leaves deciduous, to 7 inches long, coarsely toothed, shiny bright green above and grayish pubescent beneath. The acorns are over an inch in length. A relatively fast grower.

**QUERCUS VIRGINIANA (Live Oak)**

Famous both as landmarks of southern history and for their majestic beauty. The longest-lived and slowest-growing of the two varieties, this evergreen tree reaches 60 feet in height and spread. The shining dark green leaves are elliptic to oblong.

4 to 5-ft. spread	50 00	400 00

**JUNIPERUS COMMUNIS DEPRESSA PLUMOSA**

(Andorra Juniper)

A dwarf variety also known as *J. horizontalis plumosa*. Spring foliage is silvery green, turning to a silvery purple or pinkish shade in the fall. It does not grow as close to the ground as some of the creeping forms, but lifts its branches 15 to 18 inches. Good for foundation plantings, for terraces and for rock-gardens. It thrives best in an open, sunny, well-drained location.

B&B	10	100
12 to 18 in.	\$12 50	\$110 00
18 to 24 in.	17 50	150 00

**JUNIPERUS CONFERTA (Shore Juniper)**

Spreading, prostrate Juniper with light green foliage, rather feathery; will not turn brown in winter. Will do well on sandy soil or clay.

B&B	10	100
12 to 18-in. spread	\$11 50	\$100 00
18 to 24-in. spread	15 00	130 00

### CYCAS REVOLUTA (Sago Palm)

A Palm-like cycad reaching a height of 3 to 4 feet, with handsome deep green leaves. Will stand some frost. 10

Gal. cans, 12 to 18 in.....\$15 00

### LIVISTONA CHINENSIS (Chinese Fan-Palm)

One of the easiest of Palms to grow either indoors or out, wherever adapted. Grows 20 to 30 feet on stout, obscurely ringed trunk. Handsome fan-like leaves form a dense crown, with the lower leaves declined or hanging. 10

Gal. cans, 18 to 24 in.....\$15 00

### SABAL PALM

The beautiful native Palm of the South, commonly called "Cabbage Palmetto." It has a large head of fan-shaped leaves crowning a straight trunk 20 to 40 feet tall. Good for seaside planting, for it does not object to salt water. Should be more widely used. One of the hardiest Palms.

## VINES

### BIGNONIA CHERERE (Scarlet Trumpet-Vine)

Strong-growing evergreen. Blooms yellow-orange, in clusters. Ideal for fences where a quick cover is desired. Stands sub-freezing cold. 10

Gal. cans.....\$7 50

### BIGNONIA CHAMBERLAYNI

Evergreen. Bright yellow flowers in early spring.

### BIGNONIA SPECIOSA

Evergreen. Glossy leaves and large, lavender-blue flowers in clusters.

### BIGNONIA VENUSTA (Flame Vine)

Evergreen. Profusion of bright reddish orange flowers. Tender. 10

Qt. cans.....\$3 50

Gal. cans.....6 50

### BOUGAINVILLEA, AFTERGLOW

Yellow-orange, changing to salmon and light rose. A most attractive variation.

### BOUGAINVILLEA, BARBARA KARST

Vigorous new hybrid, much the same color as Crimson Lake but branches more readily and has larger flower bracts. Blooms along the entire branch. Makes a perfect bush without staking.

### BOUGAINVILLEA, CRIMSON LAKE

A most strikingly beautiful variety with masses of bright crimson bloom. Somewhat tender. 10

Qt. cans.....\$5 00

Gal. cans.....7 50

### BOUGAINVILLEA, GLABRA SANDERIANA

#### BOUGAINVILLEA, GLABRA SANDERIANA

Evergreen. Vigorous grower; large masses of purple flowers.

	10	
Qt. cans.....		\$3 50
Gal. cans.....		6 50

#### BOUGAINVILLEA, PANAMA PINK

Light pink blooms; foliage is lighter green than Crimson Lake. Semi-climbing.

	10	
Qt. cans.....		\$5 00

#### FICUS REPENS (Evergreen Climbing Fig)

For covering buildings and walls.

	10	
2½-in. pots.....		\$2 00
Qt. cans.....		3 50

#### HEDERA (IVY), (Self-Branching Small-Leaf Type)

A fine new variety with unusually small, delicately formed leaves. Exceptionally good for use indoors.

	10	
2-in. pots.....		\$2 00
Qt. cans.....		3 50

#### JASMINUM ILICIFOLIUM

A rapid-growing evergreen vine with handsome foliage and star-shaped, white flowers.

	10	100
Qt. cans.....	\$4 00	\$35 00

#### JASMINUM SIMPLICIFOLIUM (Wax Jasmine)

Evergreen. Beautiful dark green, waxy leaves and white, star-shaped flowers. Can be pruned and grown as a shrub. Makes a splendid hedge.

	10	
Qt. cans.....		\$4 00

#### LONICERA JAPONICA HALLIANA (Hall's Honeysuckle)

A vigorous vine with fragrant white and yellow flowers in late spring and summer. Excellent for ground-cover and erosion prevention work.

	10	
Qt. cans.....		\$2 50
Gal. cans.....		4 50

#### RHYNCHOSPERMUM JASMINOIDES (Confederate Jasmine)

Evergreen. Dark shiny leaves and fragrant, star-shaped, white flowers. Hardy.

	10	100
Qt. cans.....	\$4 50	\$40 00
Gal. cans.....	8 50	75 00

**WISTERIA, PURPLE**

Strong, hardy, deciduous vine. Flowers in large clusters in spring.

**WISTERIA, WHITE**

Produces large clusters of delicately scented, white flowers.

Gal. cans .....	10	\$10 00

**BAMBOOS****ARUNDINARIA JAPONICA** (*Pseudosasa japonica*)

Hardest Bamboo, quickly growing 15 feet high. Large, handsome foliage. Spreads rapidly.

**BAMBUSA MULTIPLEX** (*B. argentea*)

Vigorous grower for hedges and screens. Handsome foliage and canes which will grow 25 feet.

**BAMBUSA MULTIPLEX, SILVERSTRIPE** (*B. argentea striata*)

A similar variety with green canes, striped with yellow near the base. The leaves are also variegated with whitish stripes.

**BAMBUSA MULTIPLEX, ALPHONSE KARR** (*B. verticillata*)

Upright clump Bamboo, with yellow and green striped canes about 30 feet high.

<b>Prices—All above Bamboos</b>	10	100
6 to 12 canes .....	\$7 50	\$70 00
12 to 18 canes .....	9 50	85 00
20 to 30 canes .....	25 50	230 00

**PHYLLOSTACHYS AUREA** (Golden Bamboo)

Rapidly spreading, very hardy Bamboo, with bright yellow canes. Very graceful. Good for fishing poles.

Single bibs .....	10	\$2 00

Medium clumps .....	12 00	110 00
Strong clumps .....	15 00	140 00
Extra strong clumps .....	\$2.50 each	and up

**EREMOCHLOA OPHIUROIDES** (Centipede Grass)

Centipede is one of the best lawn and pasture grasses for the South. Spreads by surface runners and is excellent for sunny lawns, both dry and moist soils. Centipede does not thrive under alkaline or excessive lime conditions and should not be fertilized at excessive rates. High fertilization causes heavy mat of grass with roots out of the soil and makes it susceptible to drought and disease. Close mowing at less than two inches is recommended. Will set about 1200 square feet per bushel when set one foot apart each way.

Bu. ....	\$1 65
10 bu. ....	14 50

**STENOTAPHRUM** (St. Augustine Bitter Blue Stem Grass)

Bitter Blue St. Augustine is one of our better lawn grasses, if not the best, for certain locations. Shaded lawns, coastal lawns, or those subject to salt sprays, moist to wet soils, and those too alkaline for Centipede, will support good Bitter Blue. Responds best to mowing at about two inches. Too close cutting of this grass is harmful.

A much-improved type, stronger growing, tougher, and extremely resistant to chinch-bugs. Throughout the year it seems to keep its color better than most southern grasses, will stand more dry weather, and is equally at home in sun or shade. One bushel will plant about 900 square feet of lawn if the grass is set a foot apart each way, or 450 square feet if spaced 1 foot by 6 inches.

Bu. ....	\$1 85
10 bu. ....	16 00

## HOUSE-PLANTS

### AGLAONEMA SIMPLEX (Chinese Evergreen)

Like *A. commutatum* but without variation 10  
 2½-in. pots. . . . . \$2 00

### ARECA (Chrysalidocarpus) LUTESCENS PALM

A fine house Palm, with graceful, arching, dark green leaves and yellow stems. 10

18 to 24 in., 6-in. pots. . . . . \$20 00

3 to 4 ft., 8-in. pots. . . . . 45 00

### ASPIDISTRA LURIDA

Most satisfactory for house conditions. Large, dark green leaves.

Per leaf. . . . . \$0 05

### BEGONIA, MELIOR and SCANDINAVIAN

Beautiful masses of pink bloom with attractive yellow stamens characterize these lovely Christmas-flowering plants.

4-in. pots. . . . . \$7 50

5-in. pots. . . . . 12 50

### BEGONIAS, TUBEROUS-ROOTED

Notable for their lush foliage and wide variety of brilliant colors. Blooms are often camellia-like and of almost perfect symmetry; sometimes single or semi-double. Colors range from white through brilliant yellow and orange to flaming red. Please order by color or in assortment. 10

5-in. pots. . . . . \$10 00

### GLOXINIA

A close relative of Saintpaulia but with much larger leaves. The velvety texture and brilliant tones of the bell-like flowers make them a favorite indoors during spring and early summer.

4-in. pots. . . . . \$7 50

5-in. pots. . . . . 10 00

---

Buy Peat by freight carload lots and save money.

ARECA LUTESCENS PALM

**KALANCHOE, TOM THUMB**

Succulent tropical herb with opposite, fleshy leaves, obovate oblong to 2 inches long; slightly toothed. Flowers bright orange, in flat-topped clusters. Usually blooms during Christmas season here.

	10	100
2½-in. pots.....	\$2 50	\$20 00
3-in. pots.....	4 00	35 00

**PANDANUS VEITCHI**

One of the finest decorative plants, with sword-like, sharp-pointed, green foliage striped with creamy white.

	10	100
4-in. pots.....	\$5 50	\$50 00
Gal. cans.....	20 00	

**POINSETTIAS**

Among the most colorful subjects for use as Christmas decorations.

**Mrs. Paul Ecke and Oak Leaf (red)**

4-in. pots, two to three blooms.....	50c per bloom
5-in. pans, average three blooms.....	50c per bloom

**SAINTPAULIA (African Violet)****Blue Frills**

Single, medium bloom; semi-dwarf grower. Foliage much serrated, glossy green above. Very nice.

**Blue Girl. Patd.**

Flowers of deep blue-violet, cupped, good size. The leaves are distinctively scalloped, showing lighter veining and pale spot at base. A fine upright grower that may become even more popular than its parent, Blue Boy.

**Dark Azure Beauty**

Double blue, fairly dark. Foliage average; good green.

**Double Neptune**

Flower blue-violet and quite double, medium-sized. Leaf ovate, slightly troughed with shallow crenations. Plant flat, with overlapping leaves.

**Double Rose**

Bloom very double, light violet, medium size. Foliage flat, bright green; low grower.

**Fairy Tale**

Extra large flowers of ultramarine-blue with bright yellow eye. Plants are prolific bloomers with rather upright growth habit.

**Guam**

Free blooming, medium lavender, borne on long stems. Leaves cordate, bright green, somewhat glossy, slightly serrated. Growth vigorous and spreading.

**Lady Geneva**

A spready, flat grower; leaves are round ovate and light green, showing silver-green underneath. Foliage slightly serrated and partly crinkled. Flower is double white with faint lavender toward center, borne on short stems.

**Mulberry Girl**

Large, light lavender blooms; upright grower with troughed leaves, good dark green, nearly smooth. Fine variety.

**Purple Prince**

Flower rich clear purple. Medium sized; prolific. Leaf light green, flat, pointed.

**Sailor's Delight**

Medium blue, semi-double blooms; foliage scalloped and troughed, good green, light centers.

**Seedling No. 4.**

Another Glen introduction, bearing large blooms similar in shade to du Pont Blue, on short stems. Leaves are broad ovate and the plant is semi-upright in habit, silver-green underneath.

**Snow Prince**

Good-sized, pure white blooms on intermediate growth. Leaves cordate, nearly flat, light green.

	10
2½-in. pots.....	\$2 50

Be sure to read carefully the Conditions of Sale on page 46 before ordering.

## HEMEROCALLIS (Daylilies)

Modern Daylilies are excellent for Florida gardens. Their brilliant colors, fragrance, extreme hardiness and long blooming period make them prime favorites. They grow in sun or part shade in practically any soil. Plant them in the perennial border or among shrubs or foundation plantings. Don't overlook Hemerocallis.

NOTE: The varieties marked with an asterisk (\*) are deciduous.

### CLASS A

**Bagdad.\*** Combination of orange, coppery red and brown. Long blooming period.

**Cressida.\*** Reddish orange with fulvous band. Midseason.

**E. A. Bowles.** Narrow, pointed, wide-part petals of pale gold, shading to reddish orange. Early.

**Hyperion.\*** Large, fragrant flowers of a pale luminous canary-yellow. Midseason.

**Iris Perry.\*** Tall-growing, with deep yellow flowers overlaid with bronze, like Aurantiaca. Midseason.

**J. A. Crawford.** Very tall. Handsome, wide-open flowers of a clear shade of light yellow, deepening in the throat. A strong grower with a long blooming period.

**Linda.\*** The fluted golden petals are flecked with cinnamon; sepals creamy yellow. Midseason.

**Mikado.** Golden yellow flower with mahogany-red eye zone. Midseason.

**Ophir.\*** Golden yellow, trumpet shaped. Long season.

**Sir Michael Foster.** Large, fluted, clear yellow flowers. Long season.

**Soudan.** The flower, of a rich glistening yellow, is of the full, recurved lily type, with broad, fluted and overlapping petals. A fine summer bloomer.

**Welaka.** Blooms very freely borne in May, of good substance and distinctly crepe-like and rippled in texture. Broad, spatulate petals with mandarin-orange throat which fades to the attractive rosy fulvous tone of the outer segments.

	10	
Small clumps, 4 to 5-in. diam.....	\$3	50
Medium clumps, 5 to 7-in. diam.....	4	50

### Class B

**Apricot.** Deep yellow.

**Aurantiaca.** Reddish orange.

**Citrina.** Light lemon.

**Crown of Gold.** Golden yellow.

**Fulva.** Rusty orange-red.

**J. R. Mann.** Frosted buff and yellow.

**Kwanso.** Double; orange-copper.

**Margaret Perry.** Rosy buff, yellow throat.

**Mrs. John J. Tigert.** Brazil-red.

**Orangeman.** Deep orange.

**Pale Moon.** Pale lemon.

**Vesta.** Orange-yellow.

	10	100
Small clumps, 4 to 5-in. diam.....	\$2 00	\$15 00
Medium clumps, 5 to 7-in. diam.....	3 00	25 00

### HEMEROCALLIS

## FRUIT AND NUT TREES

There is a place for both tropical and other fruit trees in every southern garden. Those sections adapted to growing citrus fruits can, of course, cater to a tremendous commercial market. For large growers such an orchard represents an important investment and brings large returns. Smaller growers and home gardeners as well will find that even a modest number of fruit and nut trees are well worth while.

### ORANGES (Field-grown on C. T. Stock)

Glen Improved Navel, Hamlin, Lue Gim Gong, Parson Brown, Pineapple, Temple, Thompson Navel, Valencia.

### GRAPEFRUIT (Field-grown on C. T. Stock)

Duncan, Foster Pink, Glenred, Marsh Seedless, Thompson Pink.

### GLENRED GRAPEFRUIT

An outstanding seedless variety. The fruit resembles Thompson Pink except that flesh of Glenred is a dark rich pink. A faint blush of this color is noticeable through the rind. In habit of growth and time of maturity, Glenred approximates Marsh Seedless. Fruit is somewhat larger and "commercially" seedless.

### LEMON, Harvey and Meyer.

### SATSUMA ORANGE Owari, Kawano Wase, and Silverhill.

The Satsuma Orange, in the opinion of many, is the most profitable fruit that can be grown north of the round Orange territory. From Savannah, Georgia, along the Atlantic Seaboard, south to Jacksonville, Florida, and in the extreme southern portions of Louisiana and Mississippi, it is a good money crop. Our trees on Citrus Trifoliata, grown with the greatest of care, will make paying groves, and the easy-peeling fruit of these fine "Kid Glove" Oranges are a welcome addition to the home orchard.

## DOORYARD PLANTINGS—AN IMPORTANT NEW USE FOR CITRUS!

While the idea has been used spasmodically for years, its application to the landscaping of present-day homes as an entirely feasible and desirable adjunct is now becoming more fully realized.

"Dooryard citrus" trees may be used as a source of fruit, for ornamentation, or for a combination of the two. Since citrus trees are very ornamental when properly handled, the planting can be made to blend with the overall design and also produce an abundance of good fruit. With an adequate plan and proper selection of varieties, it is possible to have healthful citrus fruit during most of the year.

The intelligent use of "dooryard citrus" landscaping can and should be undertaken wholeheartedly by nurserymen and landscape designers working in citrus areas everywhere.

Acknowledgment is hereby made to Messrs. Granger and Camp for material taken from their Florida Agricultural Extension Service Bulletin No. 140, "Dooryard Citrus Plantings in Florida."

### CITRUS FOR SOUTH AND CENTRAL FLORIDA

Our extensive Citrus Nursery near Winter Haven, Polk County, in the heart of Florida's grove belt, specializes in Oranges, Grapefruit, Lemons, Limes and other adapted citrus trees that can be best grown on Sour Orange and Rough Lemon stocks. We suggest you write Glen Saint Mary Nurseries Company, Winter Haven, Florida, for wholesale and dealer arrangements in regard to this class of stock, suitable for Central and South Florida planting, and similar latitudes.

## HORTICULTURAL BOOKS AVAILABLE THROUGH US, POSTPAID

**AZALEAS, KINDS AND CULTURE.** Hume. \$4.50.

A brand-new book packed with up-to-date information invaluable to commercial grower and home gardener alike.

**CAMELLIAS, KINDS AND CULTURE.** Hume. \$6.50.

A worthy companion volume for Doctor Hume's AZALEAS, KINDS AND CULTURE, this newest work is authoritative and beautifully illustrated. It covers all phases of growing these much-admired plants. CAMELLIAS, KINDS AND CULTURE should appeal to Mr. and Mrs. John Q. Gardener, who are in need of precise instructions and adequate explanations at a very reasonable cost.

**THE CULTIVATION OF CITRUS FRUITS.** Hume. \$7.50.

This book is again available to all who appreciate clear and concise information presented in an interesting manner.

**GARDENING IN THE LOWER SOUTH.** Hume. \$7.50.

The re-issue of one of the most widely read garden guides ever published for warmer latitudes especially.

**HOLLIES.** Hume. \$6.75.

A noteworthy new book by a nationally known author. This volume is crammed full of information for all types of readers, professional as well as amateur. Well illustrated; invaluable as a text on the genus Holly.

**IN FLORIDA GARDENS.** Wilson & Ferguson. \$1.50.

Although not new, this little book presents a thoroughly indexed guide to Florida planting that will be invaluable for both new and experienced gardeners.

**THE PECAN AND ITS CULTURE.** Hume. \$2.00.

A useful guide for those desiring practical information on Pecan selection, culture and processing methods. Over 100 varieties clearly described.

## GLEN AIR-DRIED PEAT

We are fortunate in having one of the finest deposits of pure Sedge Peat in this part of the country. Analysis as determined by commercial chemists, Thornton & Co., of Tampa, Florida, is as follows:

Available Phosphoric Acid . . . . .	0.04%
Insoluble Phosphoric Acid . . . . .	0.03%
Total Phosphoric Acid . . . . .	0.07%
Nitrogen . . . . .	1.05%
Equivalent to Ammonia . . . . .	1.28%
pH Value . . . . .	4.90 (Neutral is 7)

A report from the U. S. D. A., Bureau of Plant Industry, Washington, D. C., to whom we sent samples of Glen Peat, reads in part "The material is exceptionally uniform in texture, composition and reaction. It consists of fibrous material derived from rootlets and underground stems of sedges and several grasslike plants. Plant remains from Sawgrass are not abundant, however, and organic material from Sphagnum mosses is not present. The reaction is acid pH 4.5 to 5.0."

Moisture retention ratio, 4.26 to 1. This means that Glen Peat will hold, when fully saturated with water, more than four times its own dry weight.

Normal moisture content of air-dried Glen Peat runs from 20 to 30%, and is therefore ideal for plant packing and most other horticultural uses. It may be stored in the open without fear of deterioration. For this reason, Glen Peat can be purchased in car or truck lots for use as needed.

### WHAT TO DO WITH IT

Use it for lawns, both old and new—incorporated in the soil when building new lawns, or as top dressing at least once a year on established grass.

Use it to build up humus content of light soils and to improve their moisture-holding capacity.

Use it as a mulch wherever one is indicated, but particularly for acid-loving plants such as AZALEAS, CAMELLIAS, MOUNTAIN LAUREL, GARDENIAS, HOLLY, MAGNOLIA, TEA PLANTS, NANDINA and others.

Use it thoroughly mixed with the soil in planting AZALEAS and CAMELLIAS; its acid reaction will help keep these plants in the best possible condition.

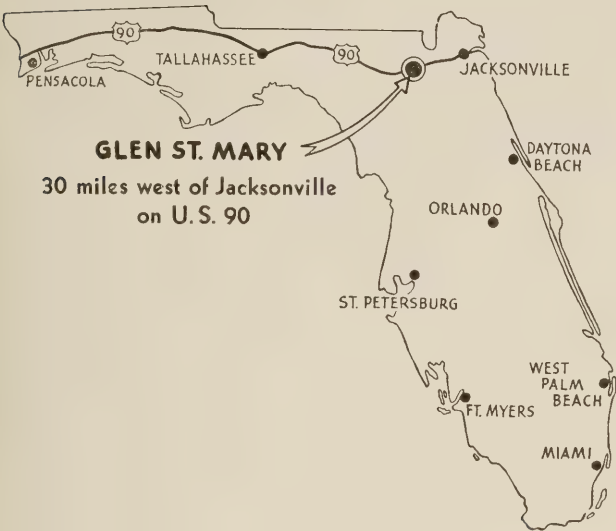

### GLEN AIR-DRIED PEAT PRICES

\$3.00 per yard shredded and delivered in city limits of Jacksonville in truckload lots (approximately 20 yds. to load) for \$60.00.

Our truck charge on full loads of bulk Peat will be 40c per road mile, outside of a radius of 55 road miles from the Mine at Florahome. There is no delivery charge for the first 55 road miles, but from there on to destination will be figured at 40c per mile *one way only*.

**Freight rates on Peat Humus, carload lots, minimum 60,000 pounds, from Florahome, Florida, to the following points:**

## CONDITIONS OF SALE

**PRICES:** Prices herein are for the Wholesale Trade only and cancel all previous Lists. They are based on current conditions and, therefore, subject to CHANGE WITHOUT NOTICE.

It is intended that orders placed at prices in this List shall consist of not less than five (5) plants of a class, as five Roses, five Oleanders, five Pecans, etc., regardless of varieties ordered to make up that five.

5 will be furnished at the 10 rate

50 will be furnished at the 100 rate

500 will be furnished at the 1000 rate.

All prices in this List are f. o. b. shipping point.

**PACKING CHARGES:** No charge will be made for packing small potted and bare-rooted stock or bulk carlot and truckload shipments. Packing will be charged (per schedule on page 45) on tubbed specimens, balled and burlapped plants, and large bare-rooted plants.

**TERMS:** Cash in full with order, 5% discount. This applies to plant orders only. To those of established credit, 2% within ten days on plant orders only or net thirty days. Cash or satisfactory references are required of those not having established credit with us.

**RESERVE ORDERS:** Reserve orders are accepted upon the condition that they shall be void should injury befall the stock before shipment from any cause not under our control. Stock held in our fields on reserve long enough to grow to larger grade will be billed accordingly at shipping time.

**On reserve orders for stock to be shipped at intervals or more than thirty days later, we require 25% advance payment. If booked and not reserved by cash payments, we are not responsible for any variety or size being on hand when stock is ordered shipped.**

**GUARANTEE:** We guarantee our stock to be well grown, true to name, properly packed and shipped according to instructions. In no case shall our liability be more than the original invoice value. There shall be no nursery stock sold under a guarantee to live, except with the understanding that, if it dies, it will be replaced *as soon as possible*, at not less than 50% of purchase price. Claims for replacement must be made in writing within thirty days after receipt of plants.

**CLAIMS:** If by any possibility an error or omission should be made, or some item should be found damaged upon unpacking, notify us within ten days after arrival of goods, or make *immediate* claim for damage to the transportation company if circumstances warrant it.

**SHIPPING INSTRUCTIONS:** We ask our patrons to furnish complete shipping instructions with each order, as to both destination and mode of shipment. Otherwise, our best judgment will be used.

**DELIVERY BY OUR TRUCKS** can be made without charge within a radius of 350 miles from Glen Saint Mary on loads totaling \$300.00 or more for our smaller trucks and \$500.00 on our big semi-trailer. In cases where bulk or weight limits the load to less than these minimums, our decision must determine what constitutes a free load. On deliveries beyond 350 miles, the overage only will be charged for at the rate of 25c per mile.

**SPLIT LOADS.** It is often possible for us to deliver several orders on one load, the trucking cost, if any, being pro-rated according to weight.
